Subject: RE: Mine sample

All,

We completed collection of the samples at approximately 1500. There were slight discrepancies in the bottleware supplied vs listed (2 oz glass vs plastic). Nothing that will affect the samples. All will be documented and samples shipped tomorrow.

Ian successfully video documented over 100 minutes of sampling. Brilliant work.

Shotcrete operations should begin again tomorrow.

Let me know if you have any questions.

Myles

Subject: RE: Mine sample

Hi All,

I have been given the okay to sample once the other team gets here. We will collect additional video with the Weston Ipad on site. I am reviewing the sampling plan. The safety issue has been resolved, only OSHA 40 personnel are allow on site or close to the Gold King. I will collect the sample and be happily videotaped.

Thanks,
Elliott

Subject: Mine sample

Morning all,

Dan Wall let me know that the legal hold is off for the mine sample and as far as the EPA is concerned, we are a go for the sample. Please confirm that the safety issue has been resolved and Elliott will be able to collect the sample. We will also need to confirm the ability to collect video of the sampling. We are expecting the second bottle set very soon and will be getting that driven up as soon as we get it. An iPad can be taken up if needed. Please let me know if anyone has any questions or needs more info.
